

# CLAIMS

1. A multi-use diaper consisting of an outer impermeable shell shaped to fit about a user, means to secure it in place and having internal absorbent means to receive and hold human liquid and solid waste, wherein the absorbent means is a set of multiple, disposable, absorbent pads, each individual pad designed to receive and hold liquid and solid waste, and each said individual pad being removable from its set through suitable openings in the impermeable shell, leaving a next disposable pad in the set in similar position to receive liquid and solid waste and be removed and disposed in turn.
2. The diaper of claim 1 wherein each pad comprises an upper absorbent portion lined with a lower impermeable material, one or more tongues for grasping and removing and an integral impermeable bag for disposal.
3. The diaper of claim 2 wherein said disposal bag is affixed in a tear away relation to the diaper shell at one end, and at the other it is suitably affixed and wrapped around the pad at the juncture where the tongue for grasping and the absorbent layer meet, said bag further comprising a closure means to seal in and isolate a used pad.
4. A garment such as a panty wherein a pad stack comprising a multiplicity of disposable, liquid absorbing pads is incorporated.

In witness whereof I sign these presents in this City of Chula Vista, California this 30<sup>th</sup> day of April, 2001.
